

John Deere Field Connect™

Accurate, timely data about soil moisture and environmental conditions in your field

John Deere Field Connect™

SEE critical and timely information about your field conditions, online.

- Evaluate soil moisture and crop uptake with easy-to-read graphs that draw data from **Soil Moisture Probes** in your field.
- Assess weather conditions by viewing **Environmental Sensors** in your field. You'll see site-specific measures of temperature, rainfall, wind, and more.
- Access a quick view of your field's data through **Field Connect Mobile**, or full reports via a secure **Web-based Service**.

SHARE agronomic and weather data directly with partners you choose.

- Easily share data with others by setting **Permissions** that grant the right access to the right people – such as input providers, consultants, and field workers.
- Opt to share your data into **Crop and Weather Models** that deliver an even more comprehensive view of your field conditions and environment over time.

INTERPRET agronomic and environmental data to make timely, in-season decisions.

- Translate **Sensor Data** into management decisions for better agronomic and economic decision making.
