

SeedStar Mobile™

Technology that helps you plant with confidence

SeedStar Mobile™

MONITOR row-by-row performance as you plant, in the cab or wherever you are, so you can address issues before it's too late.

- Customize a **Dashboard** to monitor what matters most to you. Options include singulation, population, seed spacing, and seven others.
- See planter performance row by row with **Map Layers** that reveal trends as they occur.

ADJUST your planter to optimize performance as conditions change.

- Take the app with you, outside the cab, so you can refer to row-by-row data from **Map Layers** when adjusting the planter.

LEARN from insights from this job and field to improve future performance.

- Use **Field Review** to scout previously planted fields and identify issues that could affect yield.
