1 Hydraulic Tilt Control

The hydraulic cutterbar angle adjustment enables the operator to adjust the cutting angle on the go to match changing ground or field conditions.

BE32040 – 625, 630, and 635

2 Rubber Drawbar Shield

A drawbar shield helps to prevent windrow bunching.

BE23622 – 500, 600, 800, and 900 Series

3 Heavy Duty Drawbar

The heavy-duty drawbar adds durability to tractors pulling drawn implements.

BSJ10046 – 6D Series Tractors

4 Instructional Seat

The placement of the instructional seat allows a trainee to properly observe tractor operation and diagnostics without impeding the tractor operator.

LVB25717 – 6D Series Cab Tractors

5 Fuel Tank Guard

Fuel tank bottom guards are available for to protect the fuel tank against any ground debris, rocks, or stubble when operating in rough terrain.

SJ291694 – 6D Series Tractors

6 Fuel Filter Relocation Kit

The fuel filter relocation kit is recommended when the 6D Series Tractor is equipped with a loader. The fuel filter is relocated to provide a convenient location for the daily maintenance. In the relocated position the water bowl can be more easily reached for daily inspection and draining as well as filter replacement.

SJ290032 – 6D Series Tractors with H Series Loader

7 Narrow Turn Limiters and Wide Turn Limiters

Turn limiters may be required to prevent powerline damage if the hitch point of the tractor is beyond the rear drive wheels of the tractor.

(Narrow) BE31086 – 500 and 600 Series
(Wide) BE31087 – 500 and 600 Series

1 BaleTrak™ Mounting Bracket

This easy to mount bracket is perfect for keeping the cab clutter free. Mounts to corner post for your BaleTrak pro monitor.

BE23519 – 6000 and 7000 Series Tractors

2 Door Locks

Includes two (2) lockable door handles. Key is different than the ignition key for tractor.

AL71345 – All 6R Series Tractors

3 CoverEdge™ Surface Wrap Kit

CoverEdge surface wrap stretches over the edges of the bale to cover 15 percent more surface area. This added feature offers better weatherability by allowing water to shed off the ends of the bales, and increases marketability due to less crop spoilage and better-looking bales.

BE32449 – 567, 568, and 569

4 Hi-Flotation Tire Conversion

The larger tires absorb shock loads and improve the ride quality in rough or pivot track ground, decrease compaction in soft ground, and allow increased ground speed for increased productivity.

BE31125 – 8 and 9 Series MegaWide Pickup

5 Gauge Wheels (Requires BE31133)

Gauge wheels provide smooth ground gauging over uneven terrain while protecting your pickup. Gauge wheels are adjustable to meet pickup tooth-to-stubble height requirements.

BE31132 – 6, 7, 8, and 9 Series with Regular Pickup

6

Rear Fender Extensions

The full-coverage rear fender extensions are designed to provide optimum mud control by increasing the coverage of the rear tires in all directions.

BL15018 – 6R Series Tractors

7 Cold Weather Starting Package – 110V

With this package, you can start your tractor at temperatures as low as -22 deg F (-30 C). Keeping you in the field when the conditions aren't ideal.

AL205918 – All 6R Series Tractors

Rotary Beacon Light

The rotary beacon light is installed to meet requirements in commercial or governmental applications. The rotating, high-intensity light rests securely within an amber-colored safety lens.

AL204758 – All 6R Series Tractors
