

Do More

with John Deere Attachments

1 SeedStar™ XP

View individual row-unit and overall planter performance including seed spacing, singulation and ride dynamics.

2 Pro-Shaft Drive

Smooth, durable, lubed for life and maintenance free, allowing results that are equal to or better than chain drives.

3 RowCommand™

Controls seed output by using a clutch inside each Pro-Shaft drive gear box.

4 Active Pneumatic Down Force

Match your down-pressure to your conditions. Uses a single air-bag design that gives infinitely variable down-pressure – up to 400 pounds per row.

5 Row Cleaners

These cleaners clear residue from the path of the opener, ensuring excellent row-unit operation, faster soil warm-up and reduced hair-pinning of residue in the furrow.

6 VacuMeter™

Delivers highly accurate seed spacing and unsurpassed population control.
